Matt

I plan to come to the Site on Tuesday June 28th. April Ballweg, the Project Manager of EA Engineering, EPA's contractor, will also be there. We will be at the Site by 9 am and will leave around lunch time. I have contacted Lam and he plans to be there as well.

Just a little background. The purpose of the contractors visit is to walk through the Site and observe the sampling so that they have first hand information to develop a workplan for oversight and sampling. Once they submit the workplan and EPA approves the workplan is when they will come to the Site for oversight and sampling.

By the time the equipment removal and AST cleanup takes place at the Site we hope to have the workplans approved so that they can come during your next mobilization to take split samples. We can discuss schedules when we meet on Tuesday we can iron out some of the details and questions the EPA contractor might have.

Thanks for the notification.

Will let you know if Lam or I plan to be there during the sampling.

Subject: Field Work

Raji – I wanted to let you know that we currently plan on doing additional soil sampling starting June 27 at AOI-1, USOR. I didn't think that this date was a go but it looks like things have dried up and they should get the rest of the roll off boxes off the property within the next week or so. Let's talk tomorrow about project status.

Regards,

Matt
